

VECTRON

POS Touch 14 Wide

Compact touch screen POS system
with top functions

POWERFUL FUNCTIONS

The flexible POS system is adapted to your individual requirements. Numerous special functions simplify your work.

CONVENIENT

Powerful software, an intuitive user interface including swipe controls and individual programming ensure quick, convenient work processes.

COMPLETE SOLUTION

Put together your desired solution: The POS Touch 14 Wide has interfaces for accessories such as scanners, printers, cash drawers, etc. and can be combined with mobile devices.

Your benefits

- ▶ **Brilliant displays**
Scratch-proof, capacitive touch screen with LED backlight
- ▶ **Simple operation**
Freely configurable & modern user interface
- ▶ **Expandable**
Extensive options for the connection of back office programs
- ▶ **Secure**
Perfect protection against viruses and manipulation

POS Touch 14 Wide

Modern, proprietary POS system

Whether in restaurants, cafés or bakery shops: The discreet design and compact dimensions make the POS Touch 14 Wide the perfect solution for almost any environment. The compact, capacitive touch screen is scratch resistant and robust. The 14.1" display diagonal means you can access numerous functions without scrolling, which makes taking payments convenient and efficient.

DATA SECURITY

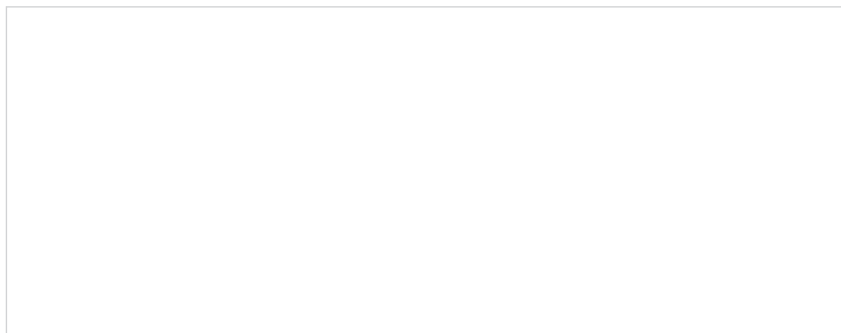

In the event of a power failure, the POS system shuts down without any loss of data. In addition, you can automatically back up the data on an external storage device (SD card or USB stick) at regular intervals and thus avoid any problems with the tax authorities.

OUTSTANDING SERVICE

Vectron products are sold via a dense network of specialist trade partners. This ensures you receive expert advice, individual solutions and reliable 24/7 service provision* on-site or via our hot-line. Remote maintenance options round off the range of services and offer you an ideal level of security.

MYVECTRON SERVICES

Exploit the benefits of digitalisation: Our cloud-based myVectron Services help you remain competitive. The reservation and customer loyalty tools integrated into the POS system allow you to manage your own individual campaigns with a minimum amount of work. And our real-time reporting functions mean that you always have the most important figures available at a glance.
