myVectron Cloud tariffs Belgium

Your individual Cloud solution. Perfectly matched to your business..

VECTRON

myVectron Standard Belgium

Extensive cloud solution with many modules.

Modules[2] included in **myVectron Standard Belgium**:

7 Modules as of 29,90 € per month.[1]

POS backup

The backup saves the configuration and programming settings of the POS system within the frame of daily closure. This means that the POS system can be put back into operation as quickly as possible after a repair or a cash register exchange.

Menu download

Upload the menu as PDF in myVectron and generate a QR code with link to the menu. This way you can make your menu available to your customers as a QR code in the form of a table display.

POS update

During the contract term you automatically get the user rights for all updates of your POS software.

Report archives

The daily reports of your POS systems are saved automatically in the myVectron Cloud and can thus be retrieved across branches, downloaded and printed.

myVectron App

With the real-time database of the reporting app, you have a clear overview of your most important company key figures online at any time via smartphone.

Connect

Simply connect your Vectron back-office software to your POS systems via the Internet without the need for a costly network infrastructure.

Remote

In case of support, a service partner can efficiently help a POS system operator through the remote maintenance option and quickly access connected POS systems.

⊞ **Optional modules[2]:**

MobileApp

The MobileApp serves as completion to your stationary POS system for quick and convenient service and invoicing at the table.

POS Software subscription *(POS update included)*

Use the capable Vectron POS software on a subscription basis and profit from the flexible, monthly term. Save also 50% when purchasing the POS 7, POS 7 PC or POS 7 Mini.

BI interface

Thanks to the BI interface it is possible to retrieve real-time reporting data of your POS systems from the Vectron Cloud across all branches. Connect the analytics and HR planning tools that suit you through this secure, modern REST API to manage your business more efficiently through numbers, data and facts.
